Making Lean Personal

Khalil Hassam
CQI Coach
HAHSTA

Office supplies and documents on the top left shelf.

Yellow measuring tape, black mobile phone, and a box of **Paradol** on the second shelf from the top.

Stacks of papers and folders on the second shelf from the top.

Office supplies including purple scissors, a blue **Bostitch BluStik** stapler, and black containers on the second shelf from the top.

Stacks of paper and a black printer on the top right shelf.

Stack of white papers on the third shelf from the top.

Stack of white papers on the third shelf from the top.

Office supplies including a box of **Exelife** pens, a blue folder, and a stapler on the fourth shelf from the top.

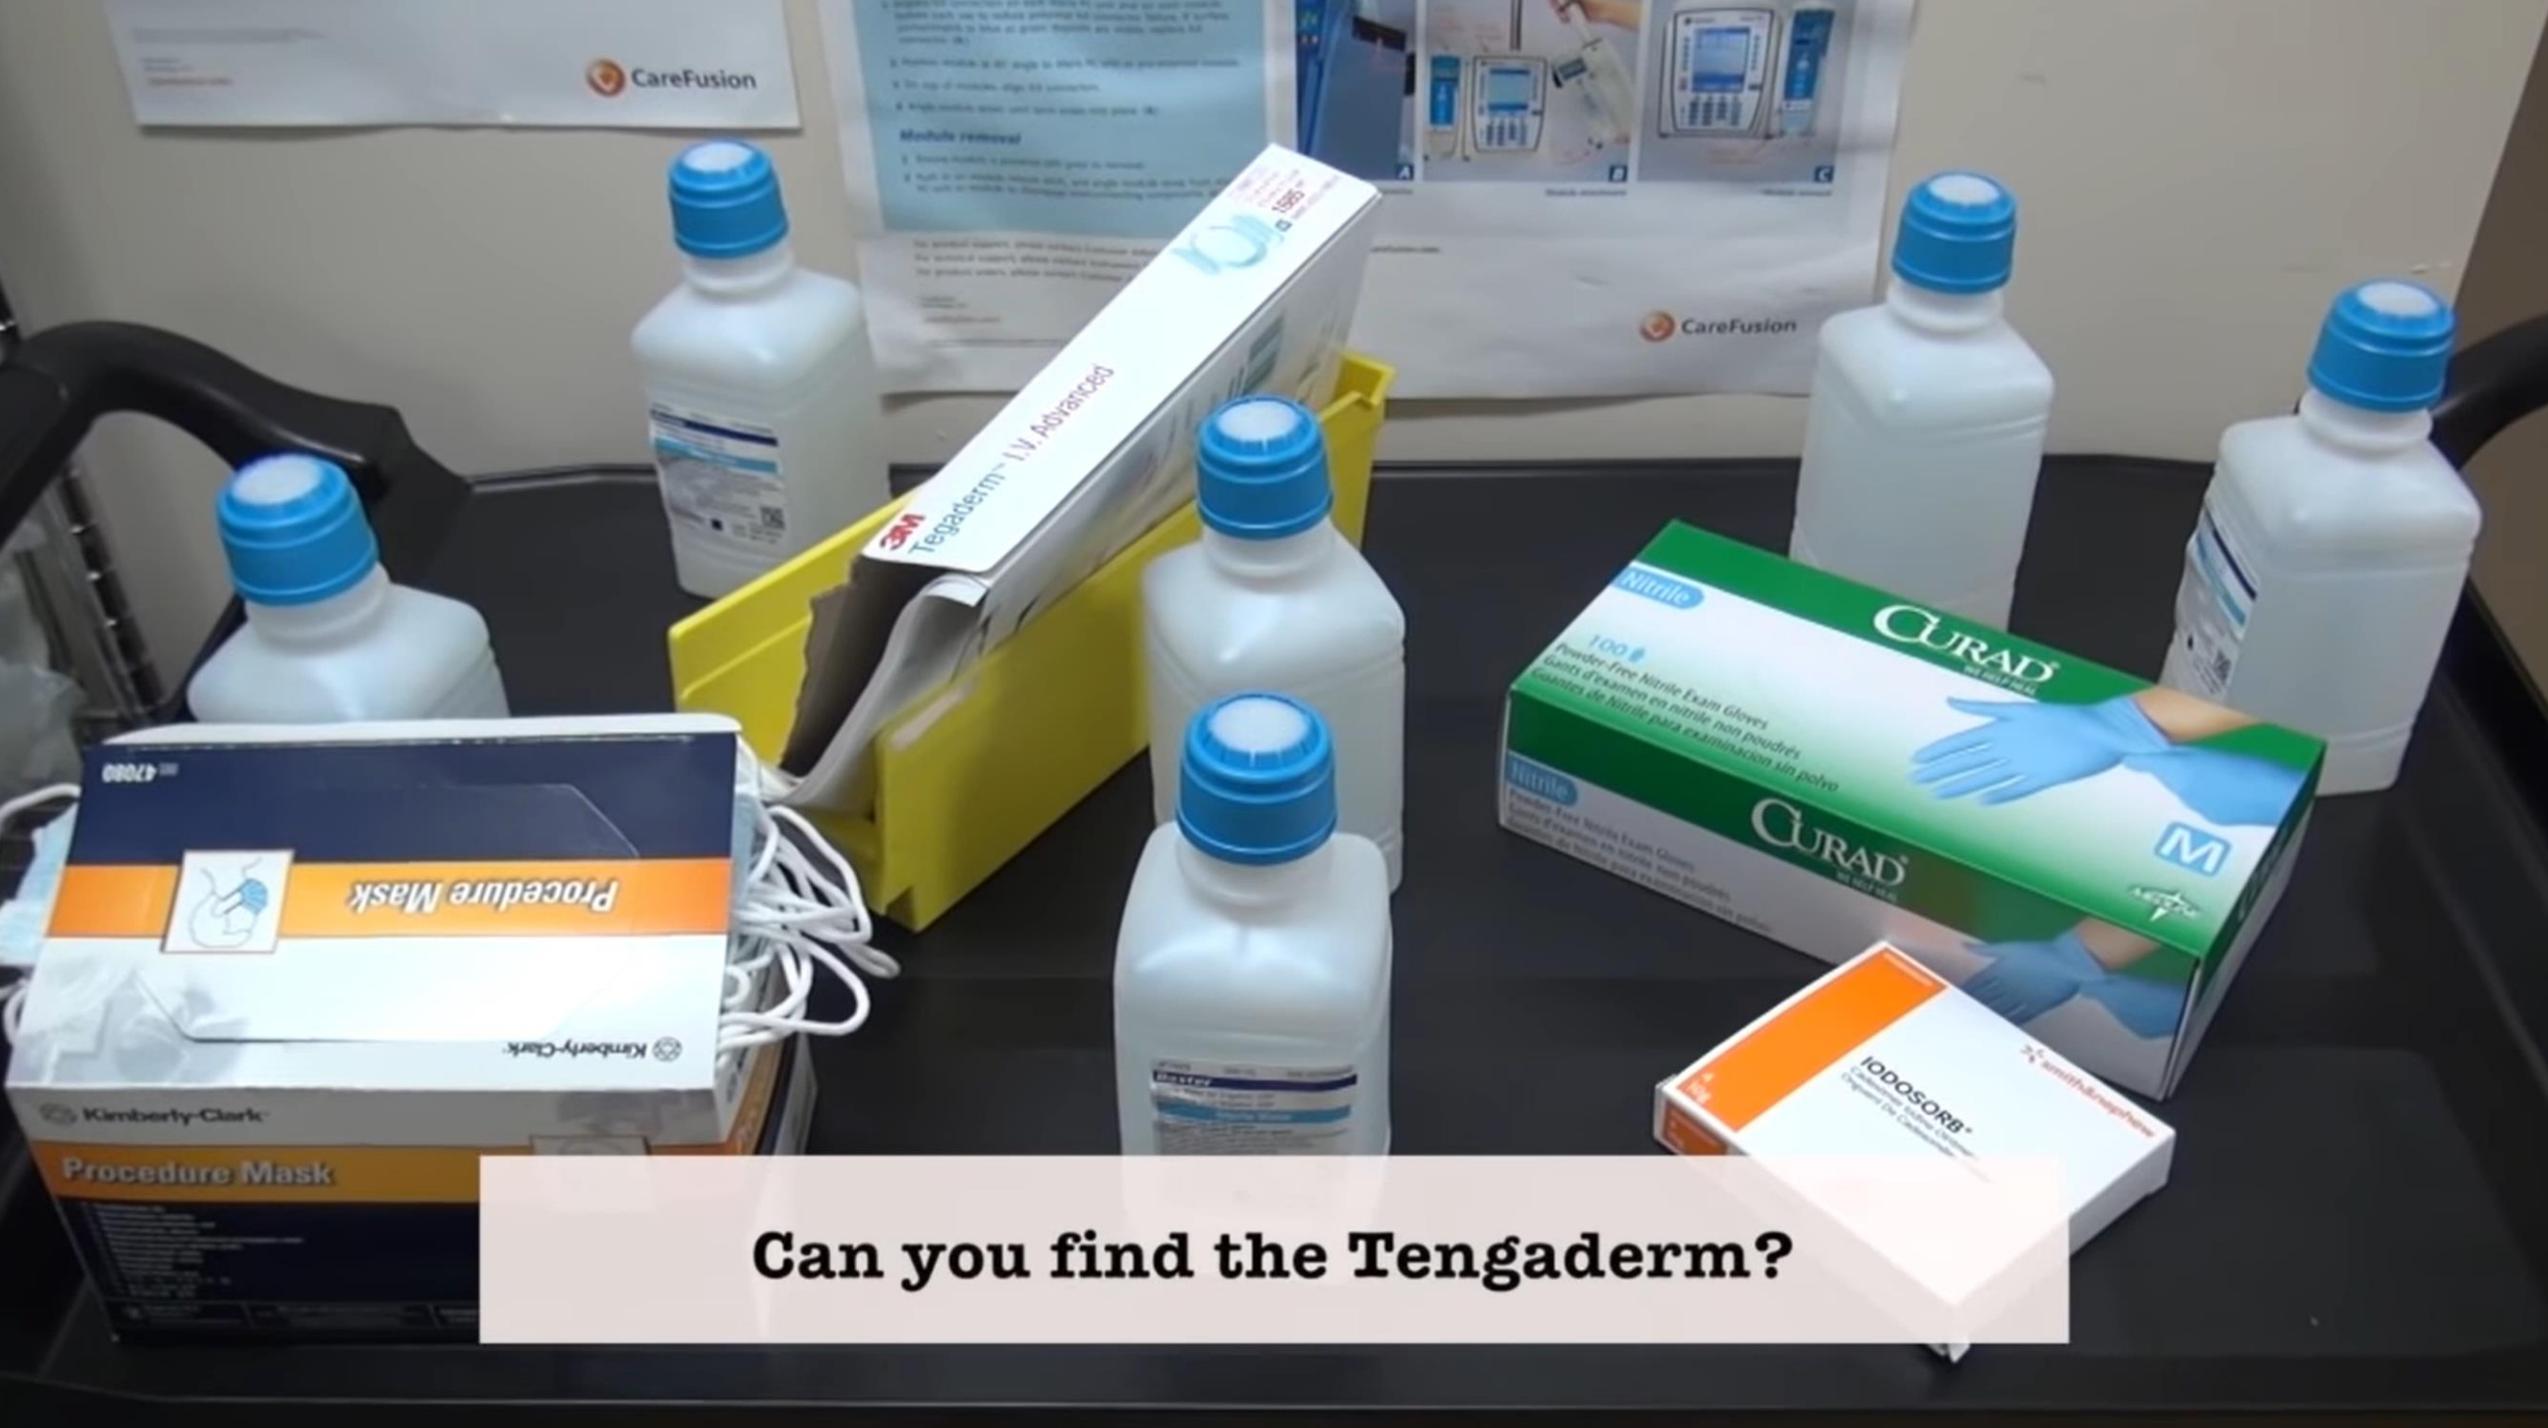

Large stacks of paper on the bottom right shelves.

Box of **LOWELL A4 Gloss Laminating Paper** on the bottom shelf.

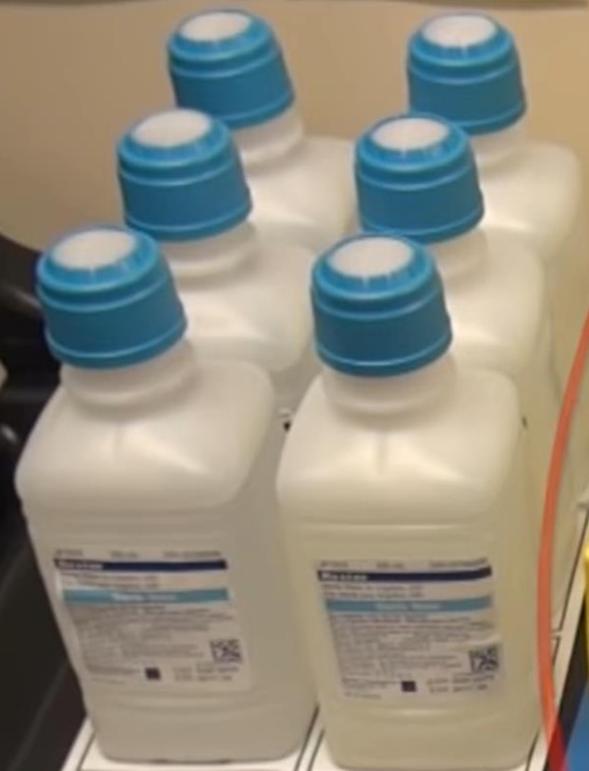

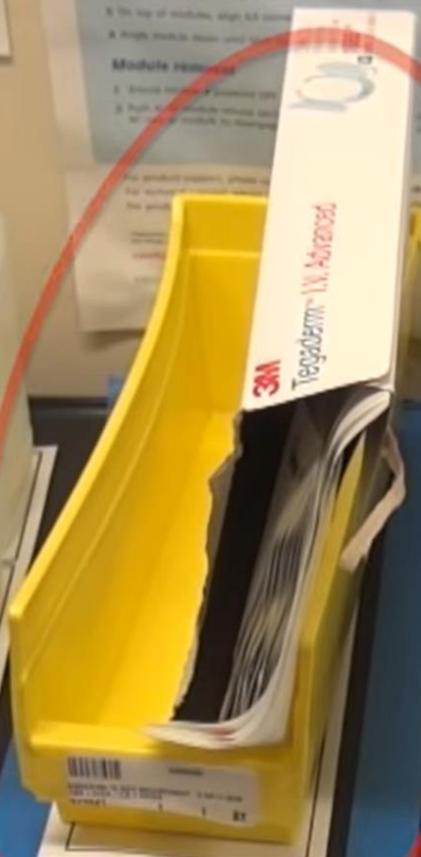

Look familiar?

Can you find the Tengaderm?

Sterile Water (6)

**Tegaderm Film
(1 Box)**

**Powder-free Nitrile exam gloves
Size Medium
(1 Box)**

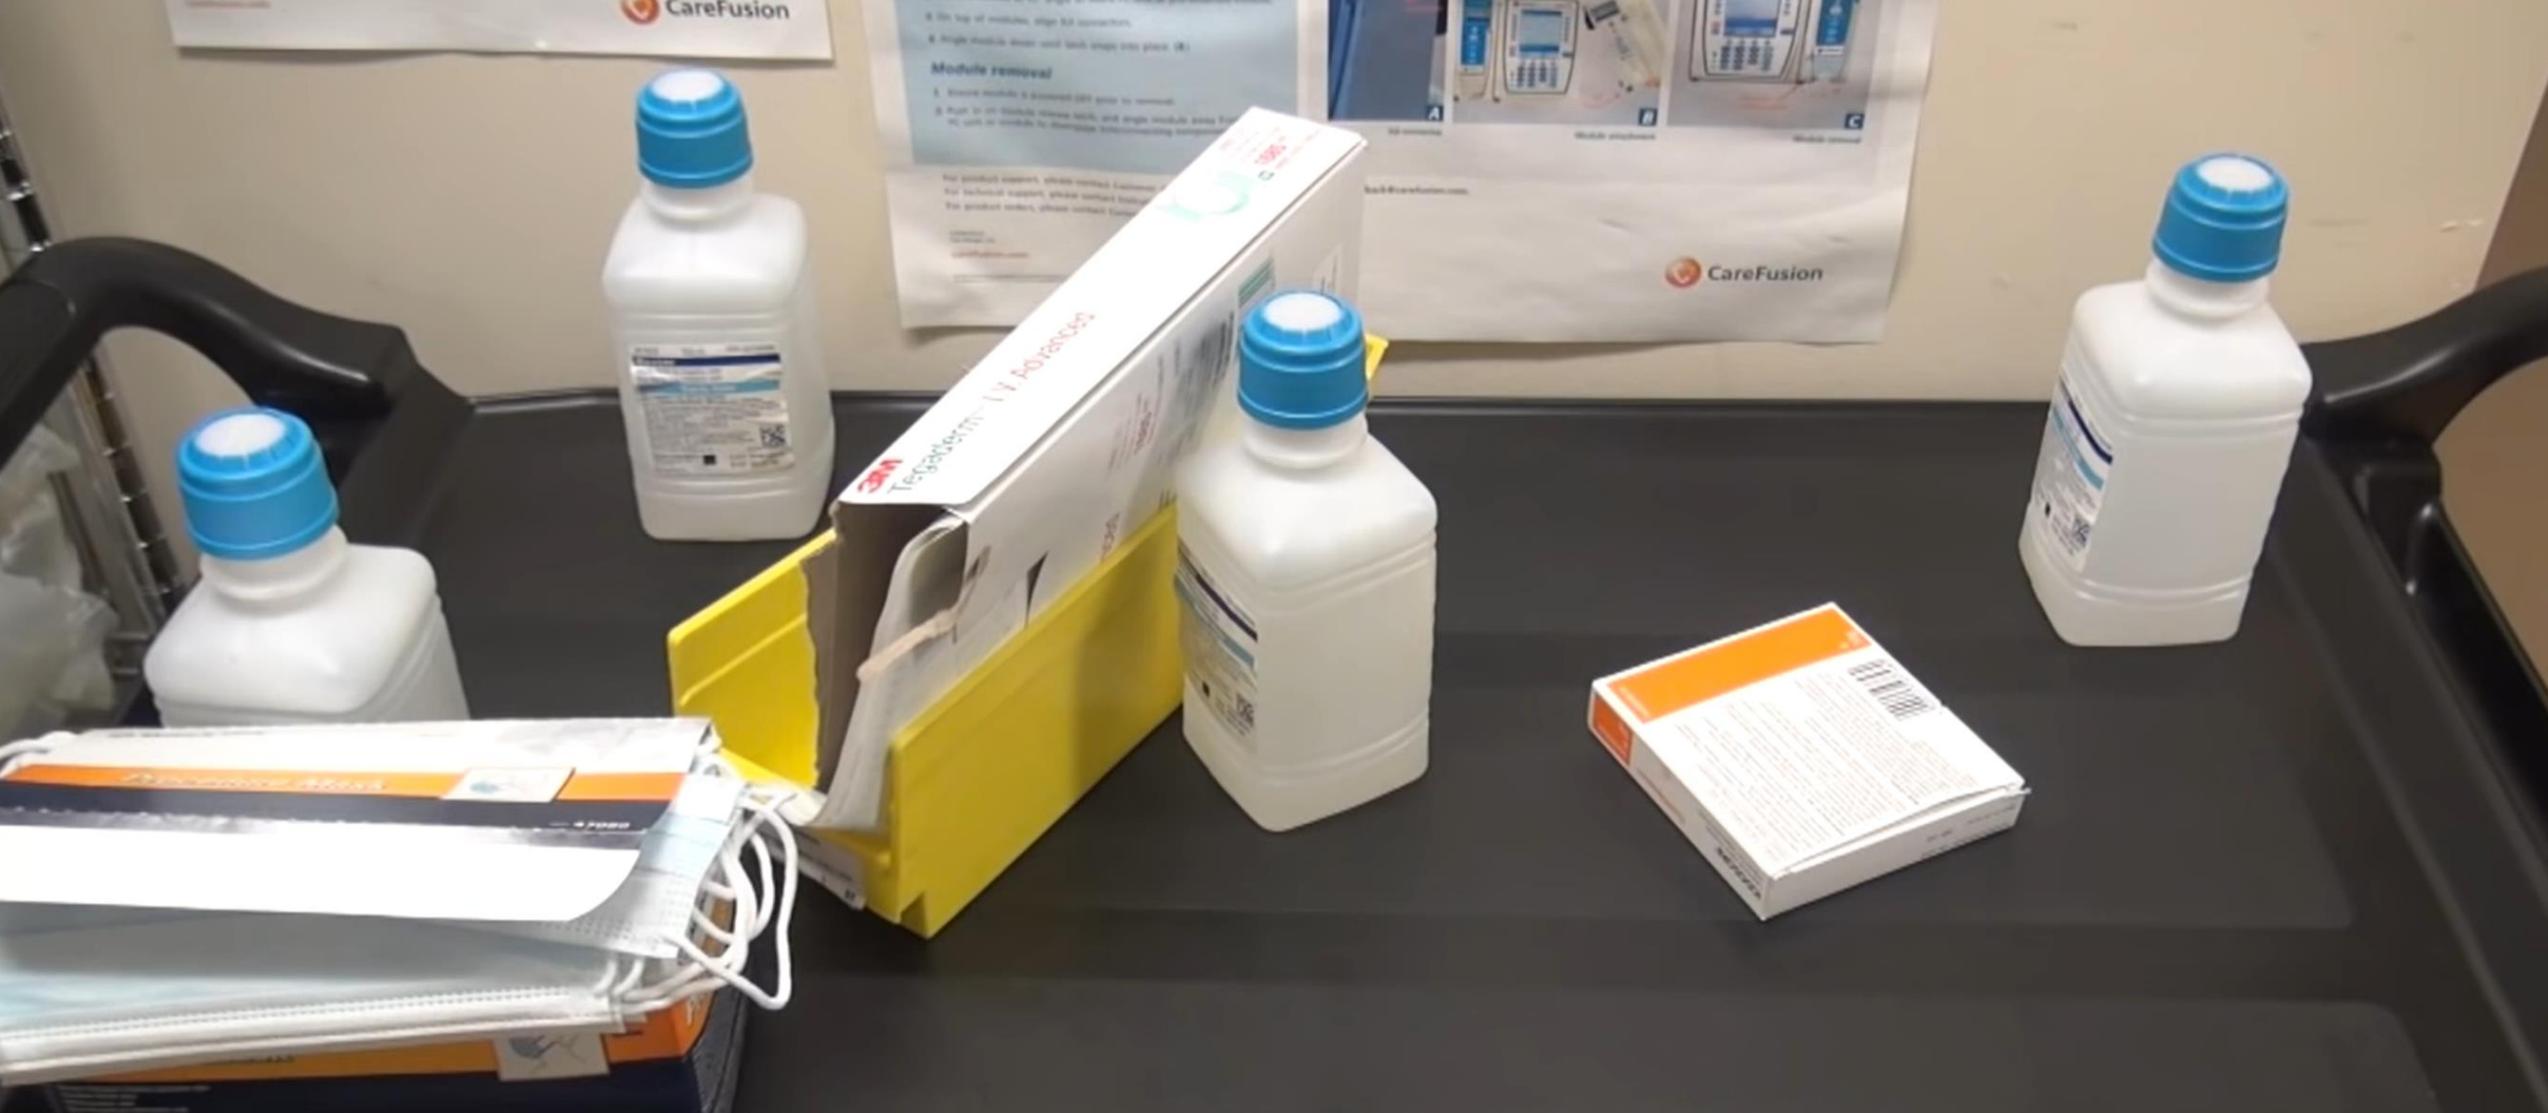

**Iodosorb
(1 Box)**

**Procedure Masks
(1 Box)**

How about now?

Can you tell what's missing?

Sterile Water (6)

**Tegaderm Film
(1 Box)**

**Powder-free Nitrile exam gloves
Size Medium
(1 Box)**

**Iodosorb
(1 Box)**

**Procedure Masks

How about now?

QUICK POLL

RAISE YOUR HAND (AND KEEP RAISED) IF...

1. I have studied lean
2. I practice lean
3. I practice lean daily

DISCLAIMER

I AM NOT AN EXPERT

- Curious about Lean and sharing what little I know
- This is a *relaxed, close to the ground* take on lean
 - Not a lecture session
 - Lots of showing (nine lean projects)

MY STORY

- Spent 5 years studying QI
- Practiced and documented quarterly (sometimes)
- Studied 5 years *more*

- QI Lead, Data, Admin, Ops, etc.

WHAT I SAW OVER 10 YEARS

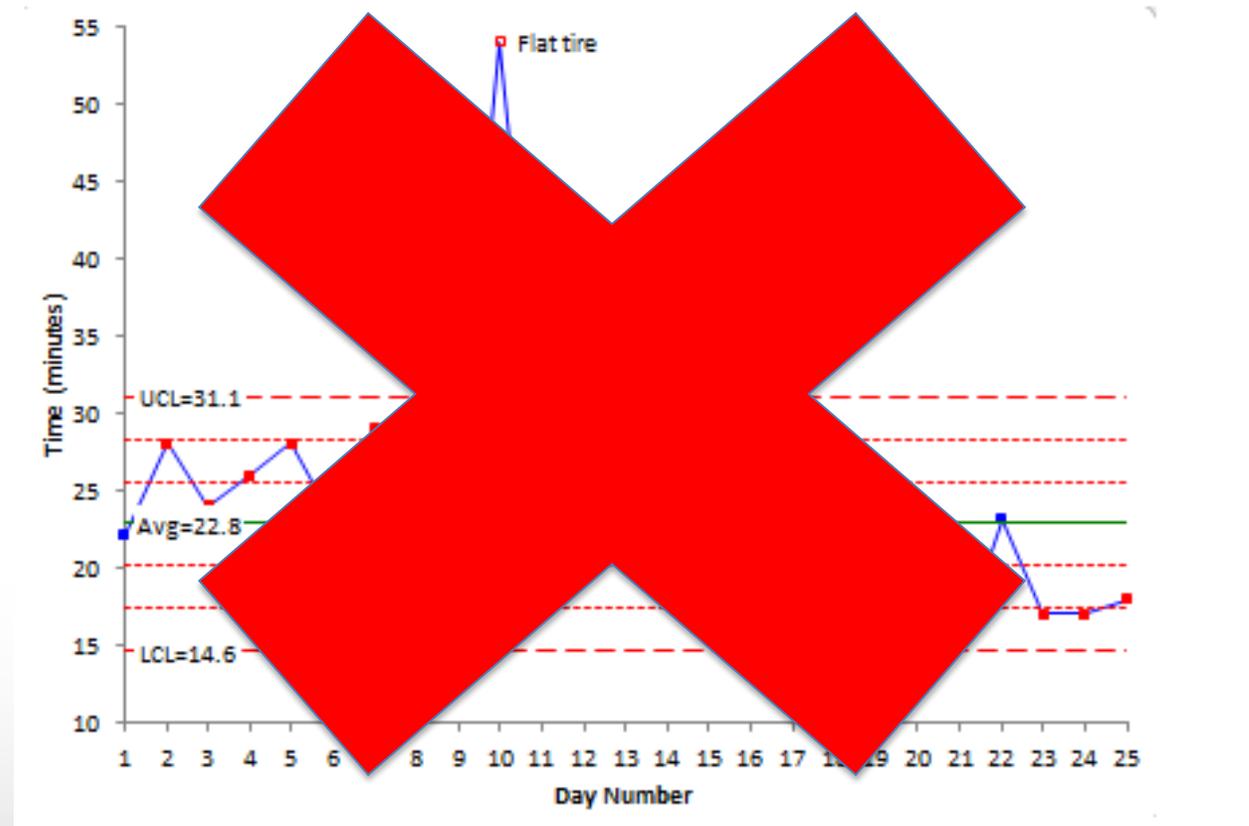

BIG
Gorgeous
Goals

QI AS FUN?

YES! WITH LEAN!

GROUND RULES

1. Lean is simple!
2. You are my customer

MY GOAL

“I WILL SEE WASTE”

WHAT IS LEAN?

WASTE – SEE IT, ELIMINATE IT

GOAL:

Provide perfect value to the customer
with a perfect process
that has zero waste

HOW:

CONTINUOUSLY IMPROVE EVERYTHING

Your training in:

- PDSA/MFI
- Root Cause

Now can be flexed daily

IMPROVEMENTS VIA LEAN

Cleveland Clinic

- Outpatient Chemo – wait times reduced from 20 minutes to one minute
- Increase feelings of trust within team by 50+%
- Inpatient nurse response time – cut in about half

Virginia Mason

- Eliminated waiting rooms in a few clinics
 - Working to eliminate waiting rooms across all their sites

Pediatric Hospital

- Staff applied lean principles to value stream map their practice, saved \$8 million during two years

N. VA Hospital Group

- 31% drop in average waiting time
- 4x reduction in customers that left without being served

https://legacy-uploads.ul.com/wp-content/uploads/sites/40/2015/02/UL_WP_Final_Applying-Lean-Principles-to-Improve-Healthcare-Quality-and-Safety_v11_HR.pdf

8 DEADLY SINS OF WASTE

8 Wasted Potential

Could be improving the kitchen

7 Waiting Time

Customers are waiting for fixed order

1 Over-Production

Make too much food

2 Transportation

Transfer food from the kitchen

3 Excess Inventory

Extra food sits in inventory

FAST FOOD STYLE

6 Wasted Motion

Wasted motion from reworking finished food

5 Over-Processing

Pickles have to be removed from food

4 Defects

Customer doesn't want pickles!

OVERPRODUCTION

EXTRA, OR BEFORE REQUEST

Unnecessary labs/tests

Over ordering medication the customer doesn't need

Peak staffing during non-peak times

Bad: I have 45, 600mg Ibuprofen

1 Over-Production

Make too much food

TRANSPORTATION

UNNECESSARY MOVEMENT OF SUPPLIES / PEOPLE

Clinic flow of customers – is it seamless, or are they moved around from room to room? Why are they moved?

Phlebotomy room is far from exam rooms

Provider moves from room to room

Good: I went to see my Doctor, the doctor came to get me, all services were in one room

Bad: old provider's office treated me like a shuttlecock

2 Transportation

Transfer food from the kitchen

INVENTORY

SUPPLIES AND WORK IN PROGRESS

Equipment in the wrong place, or at wrong levels

Inventory > demand

Medications or specimen tubes that expire

3 Excess Inventory

Extra food stits in inventory

Bad: MAs are hoarding butterfly needles because they're scarce. → team fights

DEFECTS

NOT DONE RIGHT THE FIRST TIME

Misdiagnosis

Wrong ICD code

Sent Rx to previous pharmacy

Missed collecting a lab specimen

Good: front desk confirms which pharmacy I want rx sent to, not sending to default

Better(?): provider sends when they tell me about rx

Bad: I have to go back to leave a throat specimen because it wasn't labeled

OVER PROCESSING

TOO MUCH EFFORT ON PRODUCT / SERVICE

Multiple forms, some with the same data fields

Office visit for lab results that could have been given by phone / web

Data in forms collected, but never used

Good: someone studied all the forms and eliminated duplicate fields between Medical and (off site) Food Bank intake packets

5 Over-Processing

Pickles have to be removed from food

MOTION

UNNECESSARY MOTION

Supplies not stored where needed

Extra clicks in EMR

Clinic flow is inconsistent with clinic layout

Unnecessary twisting, moving, to complete tasks (e.g. lab processing, eye exam)

Good: we implemented a 'supermarket' of supplies and stocked each exam room with appropriate level of supplies, and developed a Kanban system to quickly supply low stock

6 Wasted Motion

Wasted motion from reworking finished food

WAITING

WAITING FOR PROCESS

Customers sitting in waiting room or exam room

Staff members with uneven workloads and waiting for customers

Waiting for lab results to be sent to online portal

7 Waiting Time

Customers are waiting for fixed order

Bad: clinic ran fifteen minutes behind after first customer, because the front, but not the back, knew they were coming for pre-op clearance

WASTED POTENTIAL

HUMAN POTENTIAL NOT MAXIMIZED

Working below the level of your licensure

Not listening to employees

Focused on rework, or other unimportant tasks

8 Wasted Potential

Could be improving the kitchen

Bad: Between calling customers and fitting them in during my admin time, I spent 65 minutes working on collecting urine specimens again (that we missed on Tuesday after clinic)

8 DEADLY SINS OF WASTE

8 Wasted Potential

Could be improving the kitchen

7 Waiting Time

Customers are waiting for fixed order

1 Over-Production

Make too much food

2 Transportation

Transfer food from the kitchen

3 Excess Inventory

Extra food sits in inventory

FAST FOOD STYLE

6 Wasted Motion

Wasted motion from reworking finished food

5 Over-Processing

Pickles have to be removed from food

4 Defects

Customer doesn't want pickles!

READY TO DIVE IN AND BE ACTIONABLE?

DC | **HEALTH**

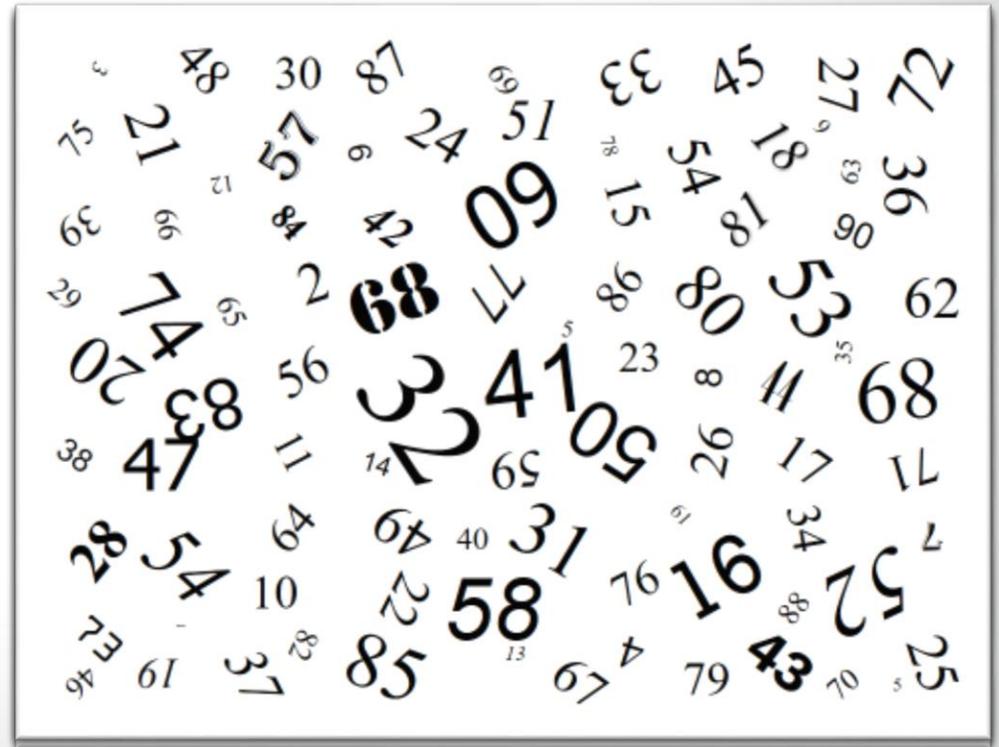

COMBATTING WASTE

- 5S
 - Just in time
 - Kanban
 - Visual control
-
- Many, many, many more tools and principles to use

5s method

- **Sort:**
 - When in doubt, move it out
- **Set in Order:**
 - A place for everything, and everything in its place
- **Shine:**
 - A clean place, is a safe, healthy and more productive place
- **Standardize:**
 - Consistency is the key to success
- **Sustain:**
 - Excellence is not an act, it's a habit

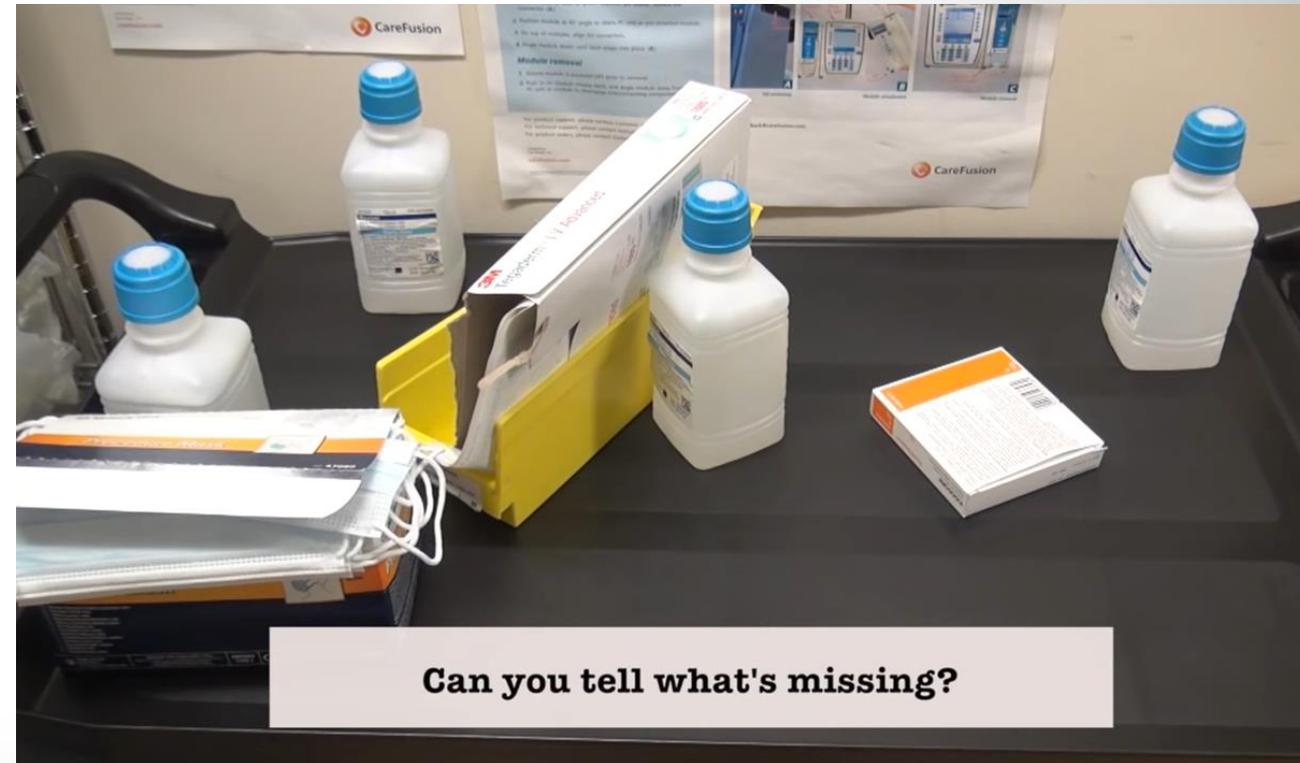

1. JUST BEING ORGANIZED?

WASTE AFTER WASTE

- Inspecting to see if I'm out of gloves
 - Over processing
- Hoarding of supplies because we're always out
 - Inventory
- Running to supply room to get gloves...
 - Motion
- ...During a client visit
 - Waiting
- Clinic runs 90 seconds behind... times 10
 - Defect

Kelly clamps	Surgical blades	Scalpels
	3-0 Nylon Straight Suture	0 Silk curved Suture

exidine

Wound Swabs	MRSA Swabs
	Thermometer

IV

SOLUTIONS/ SUPPLIES

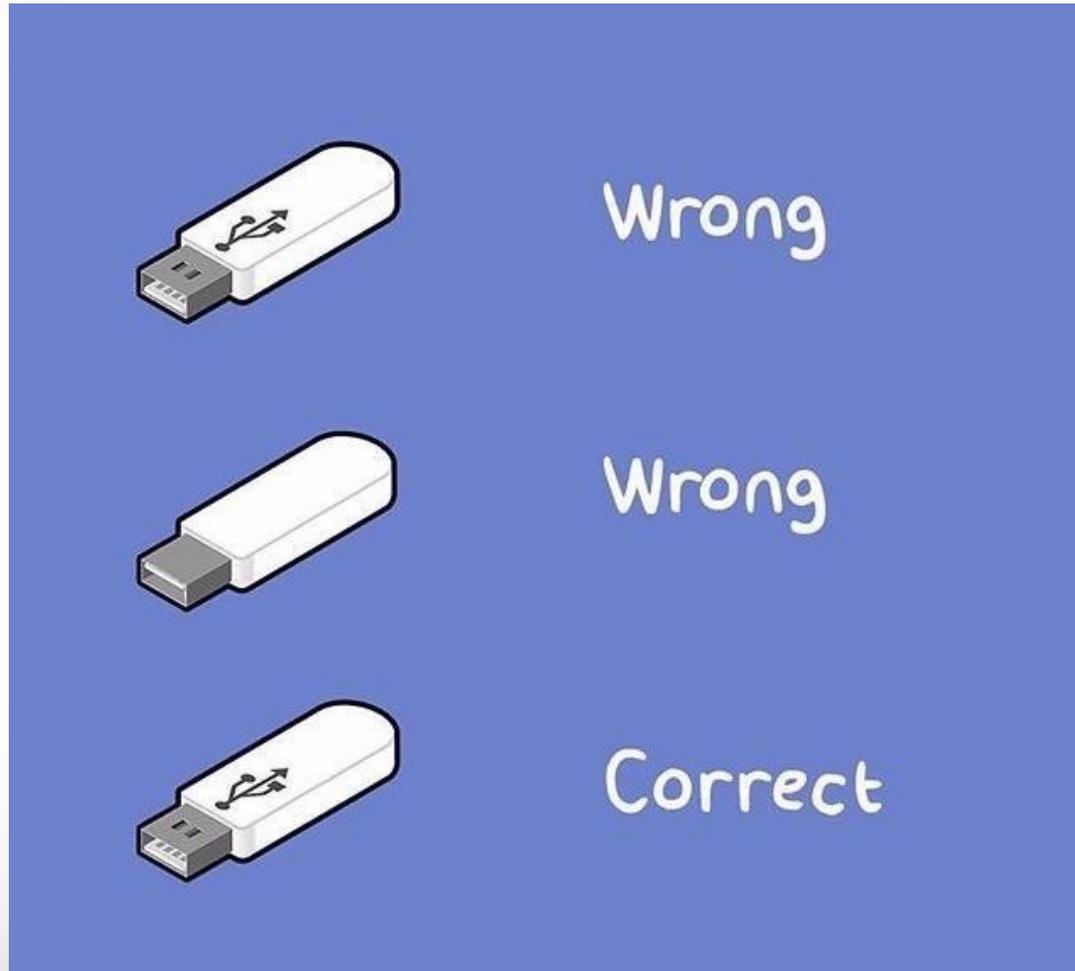

WASTE MULTIPLIED

- Breakdown of non productive time per shift
 - Looking for things = 30min
 - Waiting for things = 6min
 - Other = 6min
- Total = 42min
- If we concentrate on Looking for things time (30min)
- Early shift has 8 nurses: $8 \times 30 = 240\text{min}$
- Late shift has 7 nurses: $7 \times 30 = 210\text{min}$
- Night shift has 4 nurses: $4 \times 30 = 120\text{min}$
- Total over a 24 hour period = 9.5 hours
- Total for one ward for the year = 3,467.5 hours
= 144 days a year
= 433 shifts

REQUEST: VOLUNTEER

2. SCHRÖDINGER'S USB

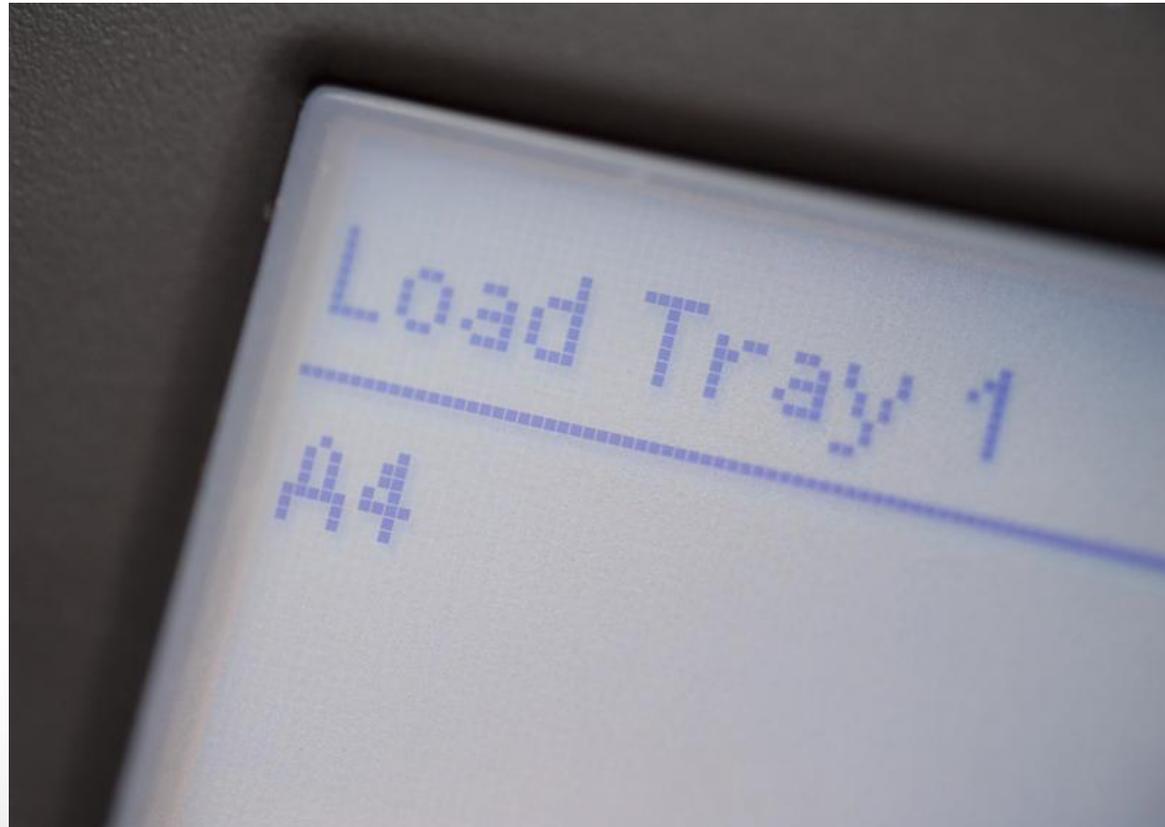

STILL IMPROVING

3. MONDAY MORNING

ONLY TWO FAXES?

BROKEN PROCESS

- Missing unknown number of faxes!
 - Defects
- Fax needs to get sent again
 - Over processing
- Customers and partner providers
 - Waiting

Root cause: process (check fax machine paper levels every day) was not followed, machine ran out of paper

ONE OF MY FAVORITE TOOLS

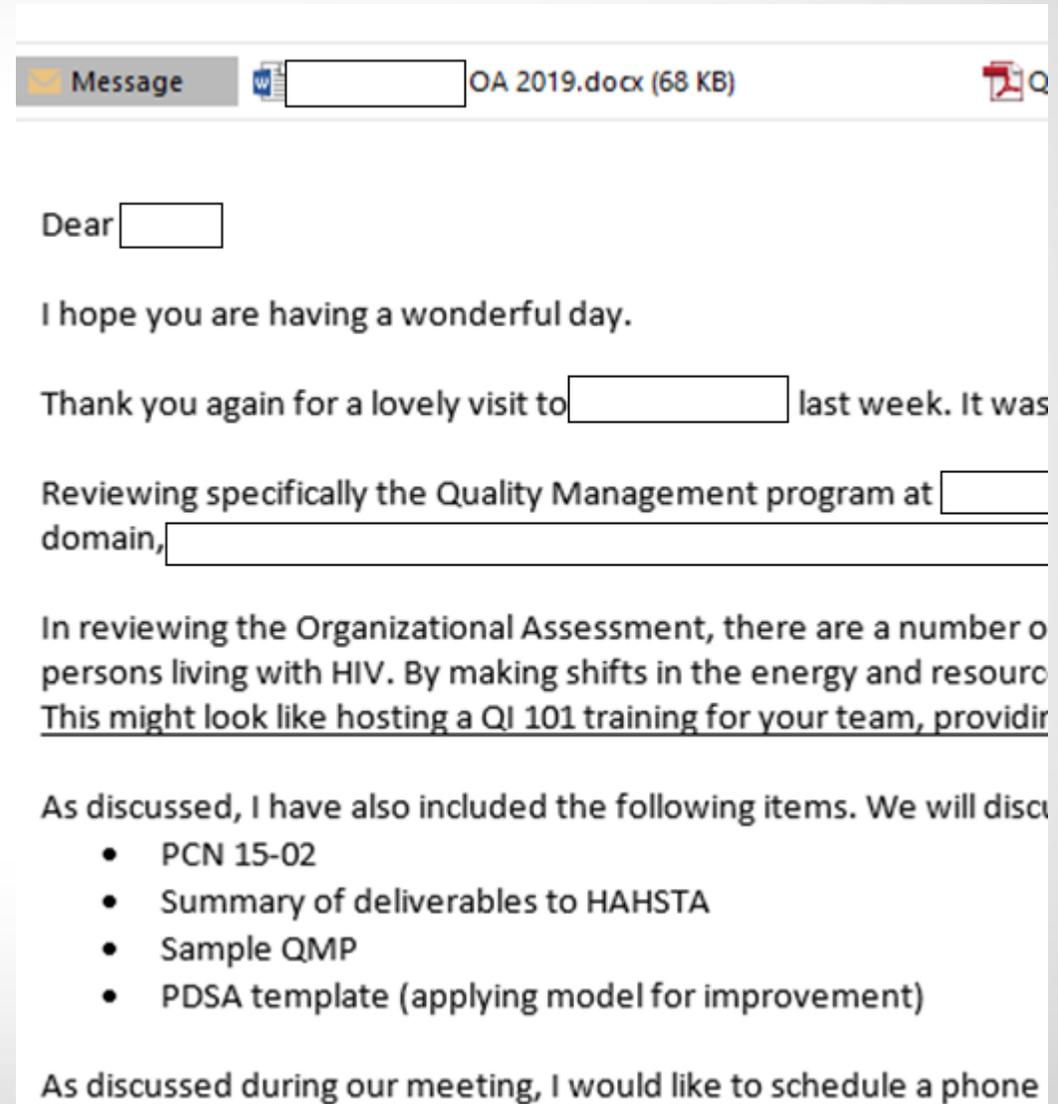

KANBAN CARD

- Know exactly when to add more paper
 - Just in time
- Easy
 - Visual control

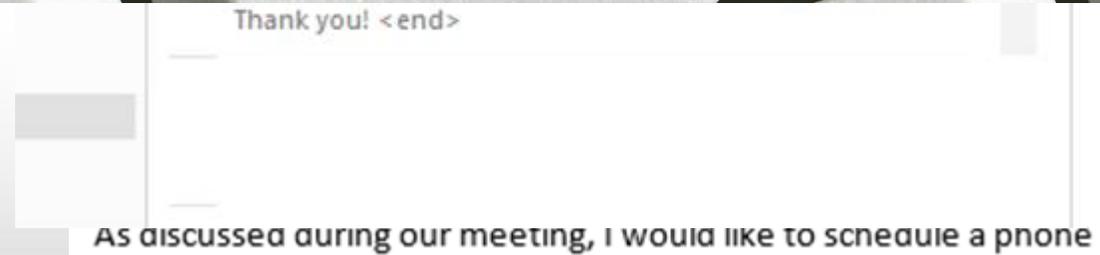

4. EMAIL WASTE

- Lots of time to write a careful, comprehensive email
 - Over processing
- I spend **five days a year** writing the same four emails
 - Human potential

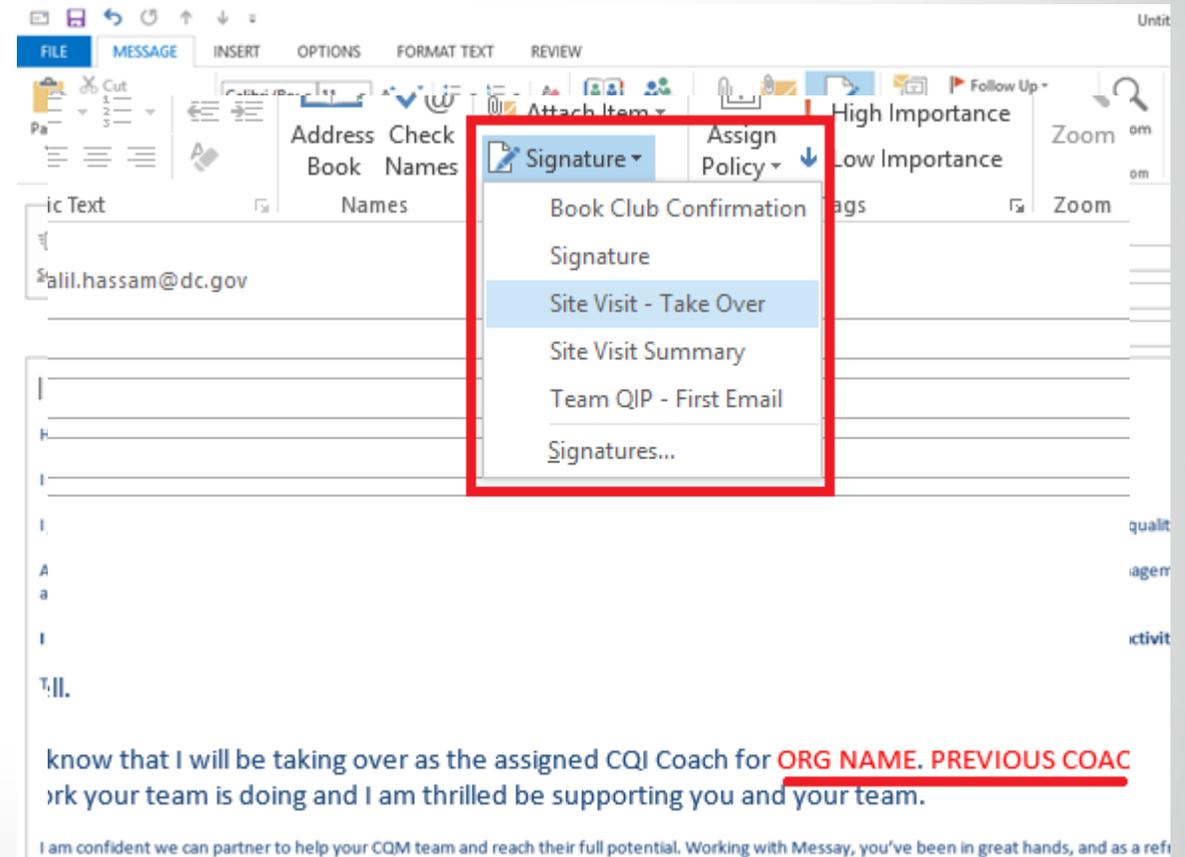

EMAIL WASTE - IMPROVED

- Searching for previous emails to use as template, then copy paste
 - Motion, waiting, over processing
- Change the name, but miss organization / date
 - Defects
- I spend **2.5 days a year** writing the same four emails
 - Human potential

EMAIL WASTE – IMPROVED AGAIN

- Have the email draft only when I need it
 - Just in time
- Know exactly what to find/replace because of red text
 - Visual control

Lean practice: Set in order, visual control, mistake-proof

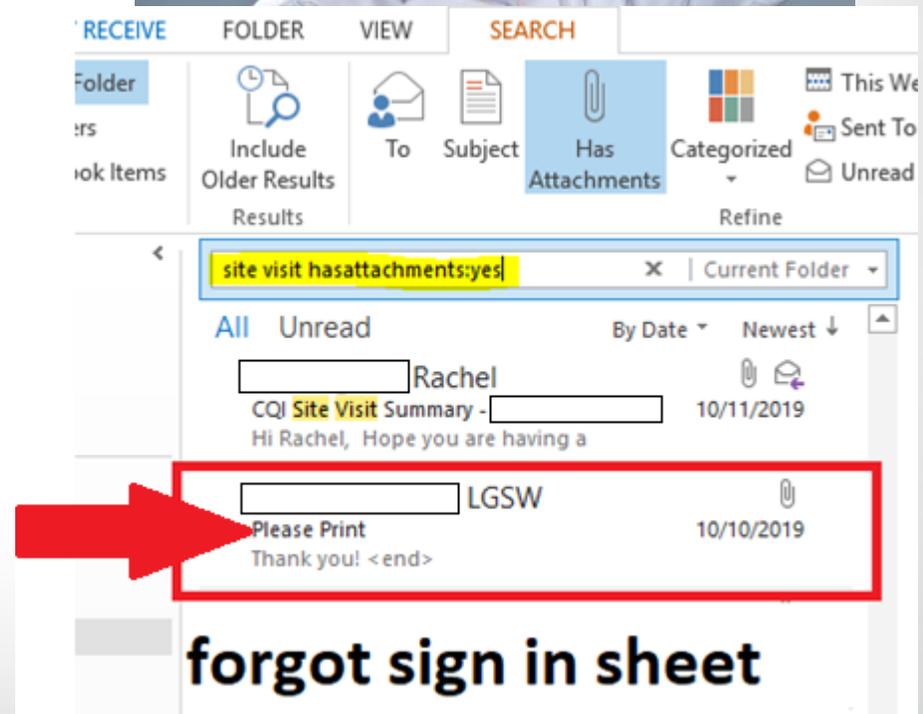

5. SITE VISIT HICCUP

- Making custom sign in sheet for each visit
 - Over processing
- Sometimes forget at the office
 - Defect

SITE VISIT GO BAG

SITE VISIT GO BAG

- Always have a stack in my work bag
 - Just in time
- Know when to make more copies
 - Kanban
 - Set in order

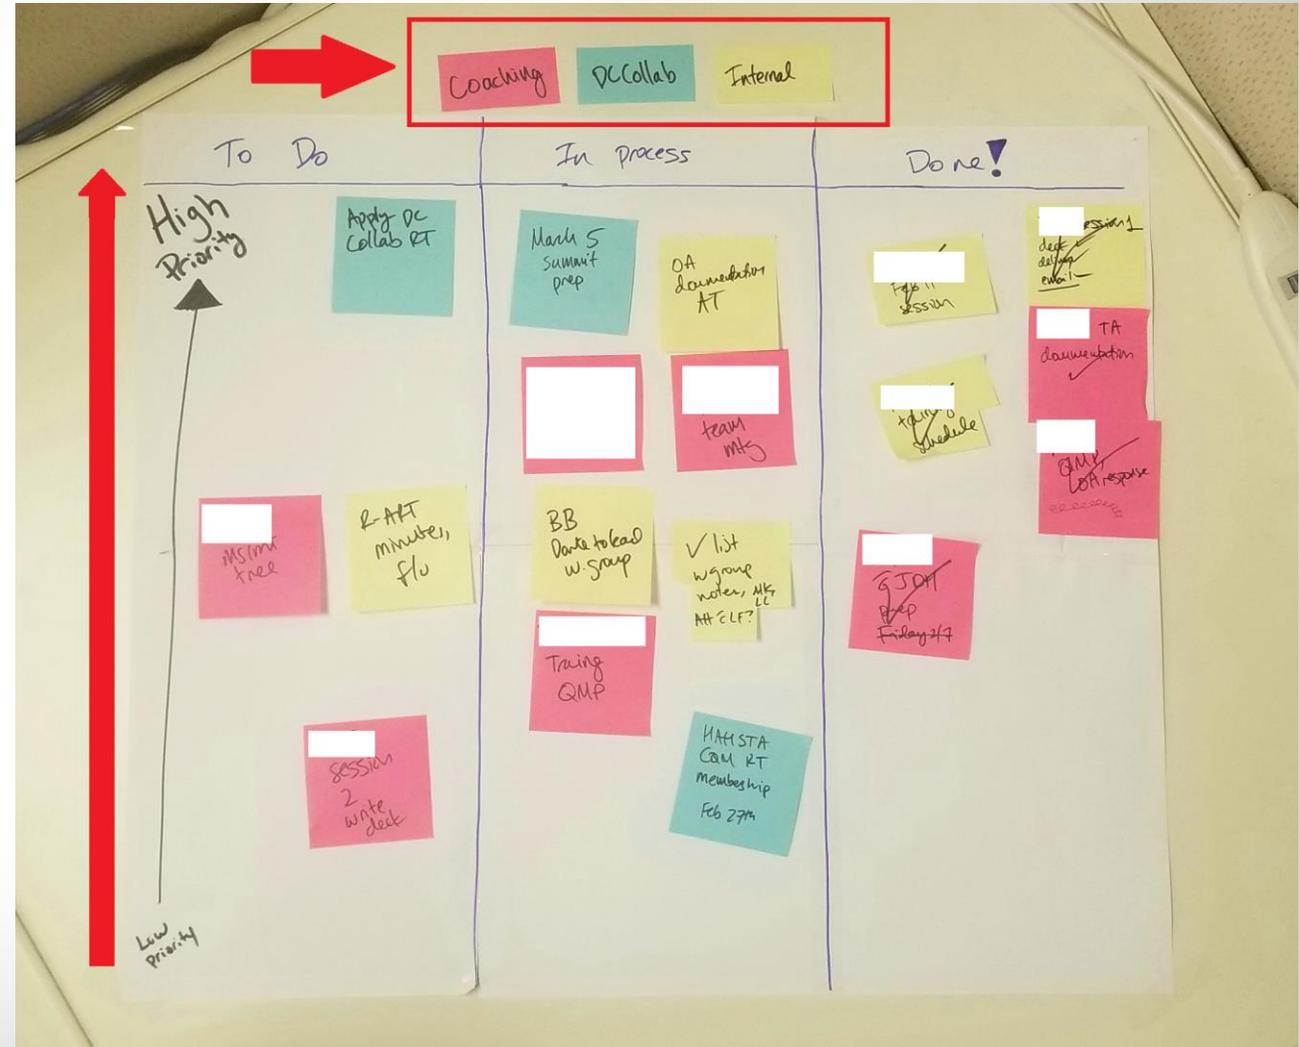

6. KANBAN MANAGEMENT

CYCLE ONE

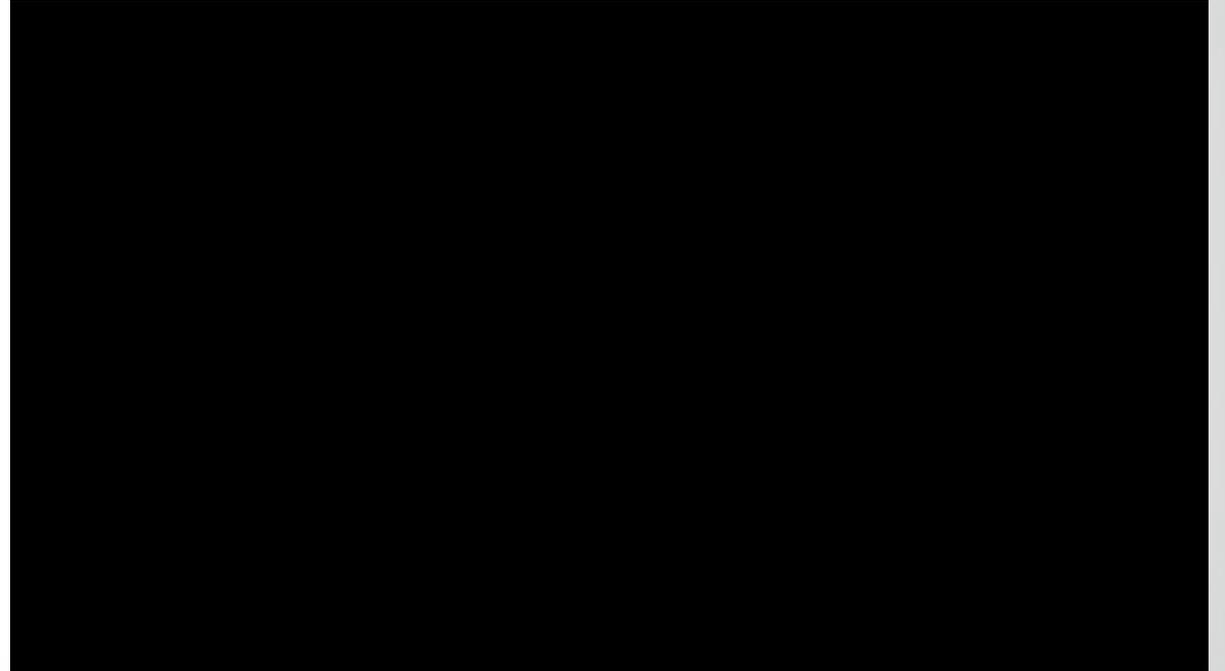

- Visualizing my work
- Limit work in progress
- Prioritization
- Easy to assess work by priority, area, and status

WHAT'S IN CYCLE TWO?

7. WE PRACTICE EVEN AT HOME

- Outdated materials
 - Inventory
- Unclear what is where, looking for what I need
 - Motion, over processing

WE PRACTICE EVEN AT HOME

REMOVING THE STRUGGLE

- Know if my wallet is missing or not
 - Visual control
- Everything has a place
 - Sort, set in order, shine

WHAT'S IN CYCLE TWO?

8. PLAYING DETECTIVE

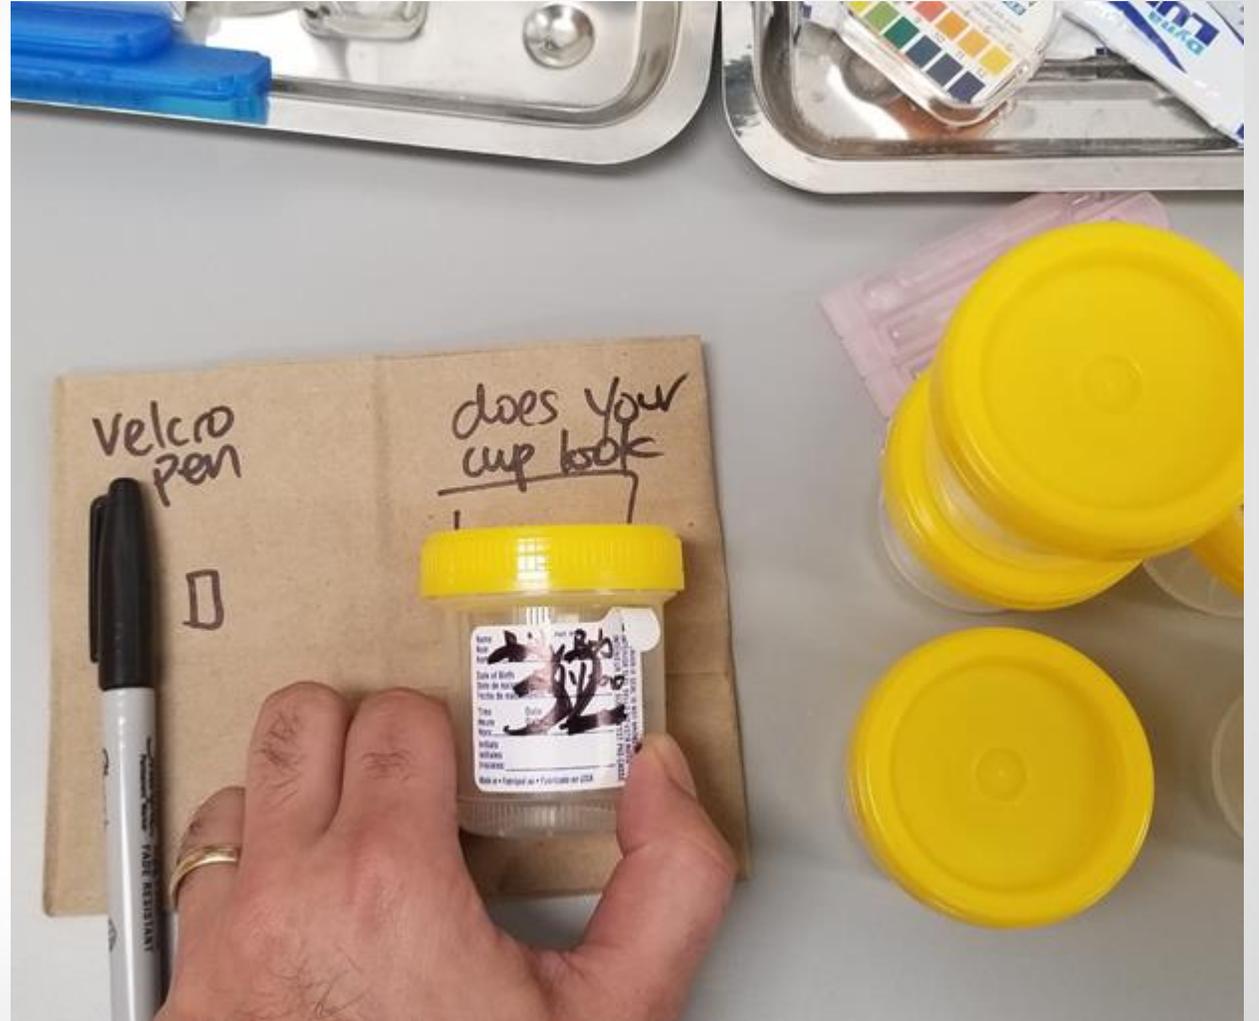

THE SITUATION

UPSTREAM

WHAT COULD WE APPLY?

- Visually busy exam room; put the information where it's useful
 - Just in time
- Put example picture with the tools needed
 - Visual control
 - Just in time

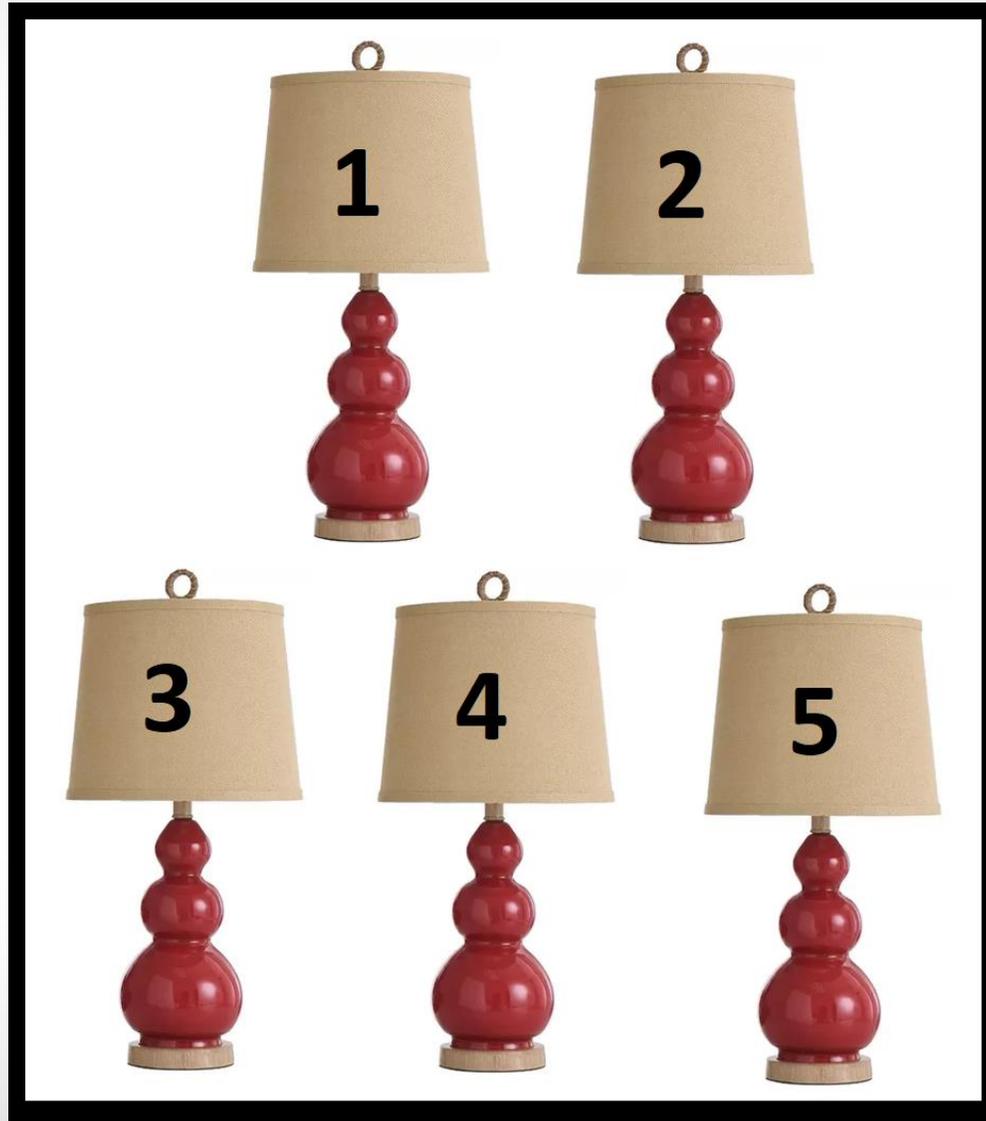

DOWNSTREAM

WHAT COULD WE APPLY?

- Customer has lots to focus on; remind them in the bathroom
 - Just in time
- Put example picture with the tools needed
 - Visual control
 - Just in time

9. MY HOUSE

OLD VS. NEW ME

CHALLENGE: PRACTICE LEAN BY TOMORROW

- 1. What waste(s) do you recognize?**
- 2. What small change could I make that results in an improvement?**
- 3. How am I measuring that change/impact?**
- 4. Share!!**

Flex your methodology skills (PDSA, RCA, etc.) in a new way!

Continually improve

LEAN BY TOMORROW?!?!

THINGS WE DID NOT COVER TODAY

1. **This was an incomplete discussion of lean**
2. Still need MFI / DMAIC methodology
3. Still need leadership support
4. DOCUMENTATION
5. Talk to your coach for more!

QUESTIONS?

THANK YOU FOR YOUR TIME AND COMMITMENT TO QUALITY!
