Needs Assessment

What is it?

- A process of collecting information about the needs of people with HIV (PWH) and those not living with HIV but who may benefit from support
- Steps involve gathering data from multiple sources on:
 - STI/HIV testing
 - PrEP and PEP utilization
 - Number of new and overall HIV cases
 - Needs of PWH
 - Current available resources (Ryan White HIV/AIDS Program and other)
- This information is then analyzed to identify what services are needed and by which groups of PWH

Expectations

- As the Recipient, HAHSTA is required to participate in the statewide comprehensive statement of need (Needs Assessment).
- All funded providers are also required to participate.

OUTREACH/ recruitment

- We will work with providers on the best options for their site. Some of these include:
 - Share a QR code with customers that links to the Needs Assessment survey
 - Provide surveys and space/privacy to let customer complete in the office
 - Provide customer with contact information (flyer with QR code) for an online appointment with an interviewer telehealth style

Timeline

- Tentatively data collection will occur April-June 2022

2022-2026 Integrated HIV/AIDS Prevention and Care Plan

Another Plan?

- National HIV/AIDS Strategy (NHAS)
- Ending the HIV Epidemic (EHE)

2017-2021 District of Columbia Eligible Metropolitan Area Integrated HIV/AIDS Prevention and Care Plan

- Integrated Plan
 - CDC's Division of HIV/AIDS Prevention
 - HRSA's HIV/AIDS Bureau
 - Planning and implementation of both HIV prevention and care services

All CDC and HRSA funded jurisdictions must submit an Integrated Plan

EHE Goals

- Diagnose** all people with HIV as early as possible.
- Treat** people with HIV rapidly and effectively to reach sustained viral suppression.
- Prevent** new HIV transmissions by using proven interventions, including pre-exposure prophylaxis (PrEP) and syringe services programs (SSPs).
- Respond** quickly to potential HIV outbreaks to get needed prevention and treatment services to people who need them.

Integrated Planning is Designed To:

- Assess resources and service delivery gaps and needs across HIV prevention and care systems to ensure the allocation of resources based on data
- Address requirements for planning, community engagement and coordination
- Improve health outcomes along the HIV care continuum by using data to prioritize populations
- Promote a status neutral approach
- Advance health equity and racial justice and equitable delivery of services and engage people with lived experience in service delivery system design and implementation
