Agency Level

Table: A General Agency Information

This table is required to be completed by all directly funded grantees. It is also required for all agencies that indirectly receive CDC funds for HIV prevention AND: 1) Provide HIV prevention services and/or 2) Provide contracts using CDC funds to support the provision of HIV prevention services.

Num	Variable Name	
A01	Agency Name	XSD (Schema) Name: agencyName
Value Option: N/A	Format Type: Alpha-Numeric	Min Length: 1 Max Length: 100
Definition:	The official legal name of the agency or organization.	
Instructions:	Enter the official legal name of the agency funded by CDC to provide HIV prevention programs. Please note: for jurisdictions that upload HIV testing data, there is currently no way to enter the actual name of the agency. The system substitutes the Agency ID for the name. System administrators can log into EvaluationWeb® and update this field to the actual name of the agency.

Table: S Site Information

A site is a facility or non-facility based setting (e.g. park, street corner), which serves as a point of service delivery. If an agency has multiple sites, this table is completed for each site. However, if an agency has multiple sites with the same zip code that are of the same site type, the agency may use a single site name and ID for the encompassing locations. For example, a mobile van that rotates to several sites within the same zip code.

Num	Variable Name	
S01	Site ID	XSD (Schema) Name: siteld

Value Option: N/A **Format Type:** Alpha-Numeric **Min Length:** 1 **Max Length:** 32

Definition: A unique alpha-numeric identification code used to distinguish the locations where an agency delivers the HIV prevention service.

A site ID is unique to an agency.

For Partner services (PS), the Site ID distinguishes between the agency site locations and should identify the locality where the PS case is assigned (i.e., the county health department).

Instructions: Indicate the unique alpha-numeric ID that will be used to link prevention services delivered by a particular agency to a specific geographic area and type of setting. If using EvaluationWeb for direct key entry, this ID may be generated for you.

If a mobile van is used, an agency may assign the same ID to sites that are of the same type AND located within the same zip code (e.g., all churches in 39126).

Table: Z1 XML Specific Fields

This table contains the variables and the XML values to be used for records to identify updated and modified records. This table is only required for jurisdictions that upload XML files to EvaluationWeb. These fields apply to all XML formats, with the exception of the now obsolete CTv1 format. (Some variable may have had different XSD (Schema) Names in older formats. See the individual variables for details.

Num Variable Name

Z03c **Schema Version Number** **XSD (Schema) Name: SchemaVersionNumber**

Value Option: Enter one value only **Format Type:** Number **Min Length:** 1 **Max Length:** 10

Definition: Specifies the version of the XSD which has been used to validate the XML file.

Instructions: This value will be hard coded within the schema.
The number should exactly match the version number specified in the appropriate XSD.

Business rules Applicable only for XML uploads after January 2013.
